SECOLOR TREE-FREE FOLDERS

Contribute simply to the environment

0% MADE OF TREES

SECOLOR® TREE-FREE

Sustainable Secolor Tree-Free folders made without trees.

We are used to cardboard being made from trees. But this does not necessarily have to be so. The Secolor Tree-Free folders are produced without using a single tree. The Secolor Tree-Free folder range is made from Paperwise cardboard. This cardboard is entirely made of agricultural waste that would normally be burned in the open air.

20% FOOD PRODUCTION

80% WASTE CONVERTED INTO CARDBOARD

100% FSC® CARDBOARD

74% RECYCLED CARDBOARD

53% TREE-FREE

LCA points, eco impact
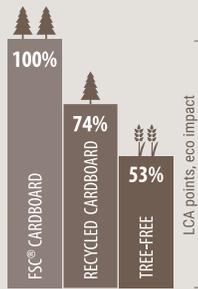

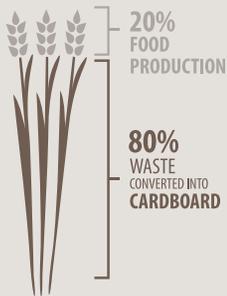

(source: LCA calculation by IVAM)

FARMERS

Tree-Free. But how?

80% of agricultural crops, such as the stems and leaves, are burned. This agricultural waste is given a second life. The wood fiber in the Secolor Tree-Free folder is 100% replace by agricultural waste.

Reduced eco footprint

The environmental impact associated with the production of this cardboard, as measured from plant to finished product, is lower than FSC® cardboard made from wood fibres and lower than traditional recycled cardboard.

More income for farmers

In addition to the environmental benefits, we ensure farmers in developing countries receive additional income from selling the agricultural waste.

JALEMA

SECOLOR TREE-FREE FOLDERS

Secolor Tree-Free Pocket File
Intended for the loose-leaf filing of documents
that cannot be per forated. Packed per 10 pieces.

Art. nr. 3823311	A4
